Anatomy and Embryology

This journal was founded in 1875 as the *Zeitschrift für Anatomie und Entwicklungsgeschichte*, edited by *W. His* and *W. Braune* and published by *F.C.W. Vogel* in Leipzig. After its second year, in 1877, the journal became the *Anatomische Abteilung* of the *Archiv für Anatomie und Physiologie*, edited by *His* and *Braune* and published by *Veit & Co.* in Leipzig. From 1892 through 1903 *His* was the sole editor. In 1904 *W. Waldeyer* became the editor. From 1913 until 1919 the journal appeared as *Archiv für Anatomie*, edited by *W. von Waldeyer-Hartz*, *H. Virchow* and *P. Röthig*. It was published until 1915 by *Veit & Co.* in Leipzig and later by *de Gruyter & Co.* in Berlin.

After 1919, publication was suspended, but in 1921 the *Archiv für Anatomie* merged with *Anatomische Hefte* to become *Abteilung 1* of the *Zeitschrift für die gesamte Anatomie*. *Anatomische Hefte* had begun in 1892 with *F. Merkel* and *R. Bonnet* as editors and *J.F. Bergmann* as publisher in Wiesbaden. In 1919 *E. Kallius* and *F. Heiderich* became the editors and *Bergmann* moved to Munich. Fifty-nine volumes had been published by 1920. When the journals combined in 1921, the numbering of the volumes continued the sequence of *Anatomische Hefte* without a break, but the name adopted was the original name of the older journal. Therefore, the *Zeitschrift für Anatomie und Entwicklungsgeschichte* (*Abteilung 1* of the *Zeitschrift für die gesamte Anatomie*) re-appeared as volume 60 in 1921. *J.F. Bergmann*, Munich and *J. Springer*, Berlin were the joint publishers. The editors were coopted from among those of both parent journals – *Waldeyer-Hartz* and *Kallius*, with the addition of *H. Braus* for the first three volumes. From volume 63 to volume 76 inclusive, *Kallius* and *Braus* were the editors and from volume 77 to volume 103 *Kallius* was the sole editor. Since volume 88 *Springer* has been the sole publisher.

In 1934, with no. 3 of volume 103, *Curt Elze* became the editor and the full title of the journal was shortened to *Zeitschrift für Anatomie und Entwicklungsgeschichte*. From volume 116 to volume 121 *C. Elze* shared the editing work with *K. Zeiger* and from volume 122 to volume 126, with *R. Ortmann*. With volume 126 *R. Ortmann* became the managing editor and was soon joined (volume 127) by an in-

ternational editorial board. In 1974, the subtitle *Journal of Anatomy and Embryology* was introduced, but it was used for two volumes only. With volume 146 (1974) the main title became *Anatomy and Embryology*; the subtitle at that point was *Zeitschrift für Anatomie und Entwicklungsgeschichte*. Since volume 166, no. 2 (January 1983), the journal has been published without a subtitle. In 1978, with volume 155, *K. Fleischhauer* and *S.L. Palay* became the managing editors. Beginning with volume 171 (1985) the managing editors were: *R. Bellairs*, *K. Fleischhauer*, *W.-G. Forssmann*, *W. Kriz*, *S.L. Palay*, *F. Walberg*. As of volume 179, no. 3 (1989), *E. Mugnaini* moved to the board of managing editors. In 1989, beginning with volume 180, *B. Christ*, *G. Gabella* and *K. Zilles* were added to the board of managing editors; *K. Fleischhauer* and *W.-G. Forssmann* stepped down. In 1992, beginning with volume 185, *O.P. Ottersen* moved to the board; *F. Walberg* stepped down. In 1993, at the end of volume 187, *G. Gabella* resigned. In 1993, beginning with volume 188, *S.T. Kitai*, *E. Raviola*, *E.J. Sanders*, and *F. Sundler* joined the board of managing editors. In 1996, beginning with volume 193, *R. Balling* was added to the board of managing editors. In 1997, with the completion of volume 195, *E. Raviola* resigned.

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in

this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-2061, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel: 613-993-9251; Fax: 613-952-8243; e-mail: cisti.docdel@nrc.ca).

Contents of Volume 196 • 1997

- Abelli L → Picchietti S 457
 Abitbol M → Sahly I 159
 Agulleiro B → Villaplana M 227
 Aharinejad S, Nourani F, Egerbacher M, Larson EK, Miksovsky A, Böck P, Firbas W, McCuskey RS, Marks SC Jr: Sphincters of canine hepatic sublobular veins respond to endothelin-1 and 3 299
 Amunts K, Schmidt-Passos F, Schleicher A, Zilles K: Postnatal development of interhemispheric asymmetry in the cytoarchitecture of human area 4 393
 Anadon R → Manso MJ 403
 Ando E → Furuya S 185
 Antolín I → Mayo JC 133
 Ashwell KWS, Mai JK: Developmental expression of the CD15-epitope in the brainstem and spinal cord of the mouse 13
 Ba M'hamed S → Bennis M 261
 Barnes JA, Smoak IW: Immunolocalization and heart levels of GRP94 in the mouse during post-implantation development 335
 Becerra M → Manso MJ 403, 403
 Bennis M, Repérant J, Ward R, Ba M'hamed S, Medina M: Cholecystokinin-like systems in the chameleon brain 261
 Böck P → Aharinejad S 299
 Ding Y, Marotte LR: Retinotopic order in the optic nerve and superior colliculus during development of the retinocollicular projection in the wallaby (*Macropus eugenii*) 141
 Domon T → Yamamoto T 115
 Dufier J-L → Sahly I 159
 Egerbacher M → Aharinejad S 299
 El-Amraoui A → Sahly I 159
 Fang J, Hall BK: Chondrogenic cell differentiation from membrane bone periosteal 349
 Firbas W → Aharinejad S 299
 Forabosco A → Pellegrini M 427
 Friedrich A → Germer A 67
 Fujita S → Shiraishi I 81
 Fumi M → Pellegrini M 427
 Furuya S, Naruse S, Ando E, Nokihara K, Hayakawa T: Effect and distribution of intravenously injected ¹²⁵I-guanylin in rat kidney examined by high-resolution light microscopic radioautography 185
 García Ayala A → Villaplana M 227
 García Hernández MP → Villaplana M 227
 Germer A, Kühnel K, Grosche J, Friedrich A, Wolburg H, Price J, Reichenbach A, Mack AF: Development of the neonatal rabbit retina in organ culture. 1. Comparison with histogenesis in vivo, and the effect of a gliotoxin (α -aminoadipic acid) 67
 Gooneratne ML → Richardson MK 91
 Goto N → Yamaguchi K 343
 Grim M → Zelená J 323
 Grosche J → Germer A 67
 Groscurth P → Kolb SA 215
 Halata Z → Zelená J 323
 Hall BK → Fang J 349
 Hanken J → Richardson MK 91
 Hatta T → Matsuda S 383
 Hayakawa T, Zheng JQ, Seki M, Kuroda Y: Fine structure of the semicompact formation of the nucleus ambiguus of the rat 465
 Hayakawa T → Furuya S 185
 Herbert H, Klepper A, Ostwald J: Afferent and efferent connections of the ventrolateral tegmental area in the rat 235
 Herron P, Zhang L, Li Z, Schweitzer JB: Effects of cholinergic depletion on glutamic acid decarboxylase immunoreactivity in the somatosensory cortex of rats 27
 Hidalgo-Sanchez M → Kálmán M 47
 Kagayama M, Zhu J-X, Sasano Y, Sato H, Mayanagi H: Development of interglobular dentine in rat molars and its relation to maturation of enamel 477
 Kagayama M → Mizoguchi I 291
 Kálmán M, Martin-Partido G, Hidalgo-Sanchez M, Majorossy K: Distribution of glial fibrillary acidic protein-immunopositive structures in the developing brain of the turtle *Mauremys leprosa* 47
 Kanegae Y → Terashima T 363

Indexed in *Current Contents*
Index Medicus and *EMBASE*

Subject index of Volume 196 • 1997

- Allergy; review 1–11
- Ameloblasts in tooth development; rat 477–483
- Aortic arch anomalies; chick 435–455
- Apoptosis (*see* Cell death in development)
- Auditory connections to tegmental area; rat 235–259
- Auditory system development; mouse 159–170
- Blood flow in liver; dog 299–309**
- Bone formation; rat 291–297, review 349–362
- Brain**
 brainstem after nerve transection; monkey 279–289
 calcium binding protein in glial cells; trout 403–416
 CD15 in brainstem; mouse 13–25
 cerebral cortex; turtle 195–213
 cholecystokinin-8; chameleon 261–268
 cholinergic depletion; rat 27–38
 dentate nucleus; human 343–348
 development; turtle 47–65
 motor cortex; human 393–402
 neocortex; tenrec (insectivore) 195–213
 somatosensory cortex; rat 27–38
 tegmental connections; rat 235–259
- Calbindin; trout 403–416
- Cartilage development; Meckel's; mouse 107–113
- CD15 epitope in CNS 13–25
- Cell death in development
 apoptosis in temporomandibular joint; rat 383–391
 Meckel's cartilage; mouse 107–113
- Cell-cell interaction
 in central nervous system; mouse 13–25
 in heart; chick 81–89
- Chemokinesis; review 1–11
- Chick development
 aortic arch anomalies 435–445
 cardiac myofibrillogenesis 81–89
- Chicken
 Herbst mechanoreceptors 323–333
- Chondrogenic cell differentiation; review 349–362
- Cilia development in retina; tree shrew 123–131
- Climbing nerve fibers; mouse 363–382
- Collagen and osteocalcin in bone; rat 291–297
- Computerized reconstruction of brain; human 343–348
- Coturnix coturnix japonica* (Japanese quail)
 Herbst mechanoreceptors 323–333
- Craniofacial abnormalities; mouse 311–321
- Cyclosporin A, effect on thymic epithelial cells; rat 171–183
- Cytoarchitecture of brain; human 393–402
- Dog, regulation of blood flow in liver 299–309**
- Echinops telfairi* (hedgehog tenrec)
 Cerebral cortex 195–213
 Endothelin, effect on blood flow; dog 299–309
- Evolution
 relation to embryology of vertebrates; review 91–106
 of cortex; tenrec, turtle 195–213
- Extracellular matrix; rat 291–297
- Eye**
 retina culture; rabbit 67–79
 retina development; tree shrew 123–131
 retinotopic order in optic nerve; wallaby 141–158
- FAL epitope in central nervous system; mouse 13–25**
- Gene transfer; mouse 363–382**
- Guanylin, effect on kidney; rat 185–193
- Gut-associated lymphoid tissue; sea bass 457–463
- Glucose-regulated proteins in development; mouse 335–341
- Harderian glands; hamster**
- Heart**
 glucose-regulated proteins in cardiogenesis; mouse 335–341
 myofibrillogenesis; chick 81–89
- Herbst mechanoreceptors; chicken, Japanese quail 323–333
- Homeobox gene *Emx2* expression; mouse 427–433
- Human**
 cellular cementogenesis in tooth 115–121
 computerized reconstruction of brain 343–348
 interhemispheric asymmetry 393–402
 postnatal development of brain 393–402
 natural killer cells 215–226
 Usher-I B syndrome 159–170
- Infection; review 1–11**
- Inflammatory cells; review 1–11
- Insectivores
 hedgehog tenrec (*Echinops telfairi*) 195–213
- Interhemispheric asymmetry; human 393–402
- Intramembranous bone; review 349–362
- Kidney**
 guanylin effect; rat 185–193
- Lymphoid tissue; sea bass 457–463**
- Macaca fascicularis* (monkey) 279–289
- Macropus eugenii* (Tammar wallaby)
 Mullerian duct regression 39–46
 retinocollicular projection 141–158
- Marsupials**
 wallaby (*Macropus eugenii*) 39–46, 473–481
- Mast cells; hamster 133–140**
- Meckel's cartilage; mouse 107–113
- Mesocricetus auratus* (hamster) 133–140
- Mossy nerve fibers; mouse 363–382
- Mouse**
 CD15 epitope in brainstem 13–25
 cell-cell interaction in CNS 13–25
 cerebellar afferent projections 363–382
 craniofacial abnormalities 311–321
 Emx2 gene expression 427–433
 glucose-regulated proteins in development 335–341
 Meckel's cartilage development 107–113
 myosin VIIA in embryogenesis 159–170
 urinogenital system 427–433
- Mullerian duct regeneration; wallaby 39–46
- Mutants**
 Emx2; mouse 427–433
 shaker-1 (sh-1/sh-1); mouse 159–170
 small eye (Pax^{sev}/Pax^{sev}); mouse 311–321
- Myelin-associated growth inhibitors in CNS; review 417–426
- Myosin VIIA; mouse 159–170
- NADPH-diaphorase; trout 403–416**
- Natural killer cells; human 215–226
- Nerve axon sprouting; review 417–426
- Nerve injury and regeneration; monkey 279–289
- Neuronal plasticity; review 417–426
- Organ culture of retina; rabbit 67–79**
- Parallel tubular arrays in cytolysis 215–226**
- Pharyngeal motoneurons; rat 465–476
- Phosphotyrosine and myofibrillogenesis; chick 81–89
- Phylogenesis and embryology 91–106
- Pituitary development; sea bream 227–234
- Precerebellar nuclei; mouse 363–382
- Rabbit**
 organ culture of retina 67–79
- Rat**
 auditory connections to brain 27–38
 bone formation 291–297
 cholinergic depletion 27–38
 denervation effect on tongue cells 447–455
 dentine and enamel in molars 477–483
 guanylin effect on kidney 185–193
 pharyngeal motoneurons 465–476
 somatosensory cortex 27–38
 temporomandibular joint 383–391
 thymic epithelial cells 171–183
- Regeneration**
 after nerve fiber lesions 417–426
 of sensory nerves; monkey 279–289
- Reptiles**
 Chameleo chameleon chameleon (chameleon) 261–268
 Mauremys leprosa (turtle) 47–65

- Pseudemys scripta elegans* (turtle) 195–213
- Retina development in organ culture; rabbit 67–79
- Retinocollicular projection; wallaby 141–158
- Reviews
- Axon sprouting in spinal cord 417–426
 - Chondrogenic cell differentiation 349–362
 - No highly conserved embryonic stage in vertebrates 91–106
 - Platelets and inflammation 1–11
 - Vasoactive intestinal peptide in sympathetic NS 269–277
- Sex differentiation; wallaby 39–46
- Somatolactin cells; sea bream 227–234
- Stress proteins in development; mouse 335–341
- Swallowing, motoneurons involved in; rat 465–476
- Sympathetic nervous system; review 269–277
- Taste buds and denervation; rat 447–455
- T cells
- in gut; sea bass 457–463
 - in tongue papillae; rat 447–455
- Teeth
- cellular cementogenesis; human 115–121
 - dentine and enamel; rat 477–483
 - small eye* mutant effect on; mouse 311–321
- Teleosts
- Dicentrarchus labrax* (sea bass) 457–463
 - Salmo trutta fario* (trout) 403–416
 - Sparus aurata* (sea bream) 227–234
- Temporomandibular joint development; rat 383–391
- Testosterone effect on mast cells; hamster 133–140
- Thymus epithelial cells; rat 171–183
- Tongue, after denervation; rat 447–455
- Trout, glial cells of brain 403–416
- Tupaia belangeri* (tree shrew) 123–131
- Urinogenital system, *Emx2* gene expression; mouse 427–433
- Vasoactive intestinal peptide in sympathetic NS 269–277
- Vein sphincters controlling blood flow; dog 299–309
